Technical Data Sheet BIOSATIVA by TREOX D

Disinfectant agent for barrier disinfection and disinfection in various industry sectors, e.g. food processing industry and similar branches (a ready-to-use solution / 25%)

BIOSATIVA by TREOX D is an environmentally friendly, fast-acting water based disinfectant solution without petrochemical and alcohol ingredients and effectively removes up to **99.99999%** of viruses, bacteria, germs, fungi and their spores.

A ready-to-use, **alcohol-free** barrier disinfectant agent with broad spectrum of efficiency - applicable in many hygiene-relevant areas of daily life. Particularly suitable for persons suffering from an allergy and persons with sensitive skin as a hygienic barrier disinfection. Suitable also for disinfection of washable surfaces. A surface disinfectant for use in large kitchens and food processing industrial sectors, for example:

- Meet processing industry, dairy factories, breweries, and many more.
- Universally usable for disinfection of waterproof working surfaces, devices, machines and floors
- Usable for various surfaces such as metal, plastic, tiles, wood, etc.

MADE IN GERMANY

Properties:

BIOSATIVA by TREOX D is an environmentally friendly, quick-acting, water-based disinfectant, free of tensides, coloring agents and perfumes, no preservatives, no alcohol, free of grease and oil, for surfaces of any type.

Safe

- Non-irritant, non-toxic and non-flammable
- No hazard pictograms

Effective

- Broad spectrum of activity
- Removes effectively **biofilms**
- Also suitable as odor eliminator

Sustainable

- No negative effects on the environment, people or animals arise through the decomposition of **BIOSATIVA by TREOX** after disinfection process in table salt and water.
- **CO₂ neutral** production

Effective also
against
Coronaviruses

INSTRUCTIONS FOR USE:

1. Remove loose dirt or pre-clean with a cleaning agent (e.g. BIOSATIVA), if necessary.
2. If necessary, the application solution can be diluted with water.
3. Spray the product with a spray head on the surface or apply the product with a cloth.
4. Observe the correct time of application depending on the type of microorganism.
5. Rinse thoroughly with clean water.
6. If necessary, dry with a cloth.

APPROVAL:

- The disinfectant is as biocide approved by BAUA under the reference number: N-83976.
- Listed in the IHO-disinfectant list
- Listed in the VAH-surface disinfectant list
- Listed in the article-95-list
- **Hygienic hand disinfection** acc. to EN1500
- **Antibacterial** acc. to EN1276, EN1656, EN14349
- **Yeasticidal** acc. to EN1650, EN1657, EN16438
- **Virucidal** acc. to EN14675 (Limited: **Sporicidal, fungicidal**)
- **Viruzid** nach EN14675 (Begrenzt: **Sporizid, Fungizid**)

DOSING:

Area of application	Application time	Note
EN 1276	15 Min.	20 °C, high and low pollution
EN 1650	15 Min.	
EN 13697	5 Min.	

SAFETY INFORMATION:

Please, refer to the label and the safety data sheet to obtain information about the safe use, handling and disposal of the product.

STORAGE CONDITIONS:

Keep the containers closed. Store only in original containers between 0 and 40 °C. Keep away from acid products.

EFFECTS ON THE ENVIRONMENT:

The product is biodegradable.

PRODUCT DATA:

pH-value:	9,0 - 9,5
Colour:	colourless
Phase:	liquid
Odour:	slight chlorine smell

INGREDIENTS:

Hypochlorous acid	0,008 - 0,085 g/l
Sodium hypochlorite	0,842 - 0,765 g/l
Water	984,15 - 979,15 g/l
Sodium chloride	15 - 20 g/l

SALES UNIT/ITEM NUMBER:

10 l (Canister)	7466029
1000 l (IBC-Container)	7466031

Other packaging sizes are also available upon request
